EDUCATION

University of Northern Iowa | Cedar Falls, IA **August 2023 – May 2026**

Bachelor's in Computer Science

- Relevant Coursework: Data Structures, Software Engineering, Databases, Networking, Embedded Systems, UI Design
- Clubs: UNI Computer Club, Cyber Security Club
- Major GPA: **3.97** | Dean's List 2023-2026

WORK EXPERIENCE

Software Engineer Intern

Wargame Trader, Remote (United States) **May 2026 – Present**

- Developed and tested **Python backend services** supporting reliable data synchronization across external commerce systems.
- Strengthened backend **reliability and automated testing** through improved validation, error handling, and continuous integration workflows.
- Enhanced cloud-based **monitoring and software quality** through automated coverage reporting and pull-request checks.

Co-Founder & Software Engineer

Volo, Remote (United States) **March 2026 – Present**

- Architected and built Volo's backend and mobile app (**React Native/Expo, Express, PostgreSQL/Drizzle**), integrating **FlightAware API** for live flight tracking, adaptive status polling, and **WebSocket-based real-time updates** with **push notifications**.
- Built Volo's social layer end-to-end: **shared trips** with invite links and **live member maps**, **friends system** with flight sharing, and a **deduplicated push notification pipeline** for gate changes, delays, and trip events.
- Developed **live flight maps** with great-circle routes and interpolated aircraft tracking across **iOS, Android, and web**, plus public SSR share pages and platform-specific install banners; shipped to **iOS App Store and Google Play**.

Software Engineer Intern

Verofi, Remote (United States) **September 2025 – Present**

- Developed an identity verification system using **AWS Rekognition** for ID capture, OCR extraction, and facial recognition with **90%+** accuracy.
- Designed and implemented a **custom anti-spoofing detection system from scratch** using MediaPipe and computer vision, creating **proprietary liveness detection algorithm**s to prevent fraud.
- Built an **in-house document signing and collaboration platform** with **AI document chat, invite-based live editing, identity-verified signing,** and **Read by Verofi**, an automated field detection system that identifies where users should place text, signatures, dates, and other required fields.

Frontend Developer & Manager

Bani's, Cedar Falls, IA **February 2023 – September 2025**

- Built a responsive website (**HTML/CSS/JS + Google Maps API**), increasing foot traffic by **15%**.
- Optimized website SEO and mobile performance, boosting traffic **20%**.
- Worked flexible schedule and extra shifts to meet business needs.
- Led team projects, streamlined operations, and resolved critical issues.

Freelance Frontend Developer

Self-Employed, Freelance **August 2023 – Present**

- Developed professional websites using **React**, **Tailwind CSS**, **HTML**, **CSS**, and **JavaScript**, enhancing client satisfaction by adhering to industry standards.

- Improved website performance by optimizing code, implementing caching, and lazy loading images and components, reducing load times by an average of **32%**.
- Enhanced websites with SEO, responsive design, multi-platform, and hosting support, ensuring accessibility across all browsers and devices, and increasing traffic by an average of **25%**.

PROJECTS

MyInteriorBudAI | Website | GitHub **March 2025**

Full Stack Development

- Developed an **AI-powered** interior design application using **Next.js**, **React**, and **Tailwind CSS**, offering users personalized design solutions with advanced customization features. Maintained a **40%** returning visitor rate.

SiteSloth | GitHub **May 2025**

Backend Development

- Developed a network management tool using **Python** for throttling internet speed for specific domains using mitmproxy, designed to manage network traffic and enhance productivity by controlling access to distracting websites. Reduced distraction time by **40%**.

TubeStalk | GitHub **February 2025**

Frontend Browser Extension

- Developed a YouTube browser extension using **JavaScript**, **HTML**, and **CSS** that enhances YouTube viewing by automatically pausing and resuming videos based on user attention, leveraging face detection technology using face-api.js. Averaged **98ms** response time for face detection triggers.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, C#, SQL, PHP, HTML, CSS
Frameworks/Libraries: React, React Native, Expo, Next.js, Node.js, Express.js, TanStack Query, NestJS, GraphQL, Tailwind CSS
Tools: Git, CI/CD, NPM, Yarn, Shopify, MongoDB, Firebase, MySQL, Figma, Docker, PostgreSQL, WebSockets, AWS
